Cooling Cascade

Staff reported a third small problem in Data hall A: water on the floor, a musty smell and warmer air.

Could Cost If We Wait	Cost to Fix Now	Time Left Before It Fails
$113,525	$1,010	18 hours

RECOMMENDATION

Immediate Repair

Issue: a cooling unit in Data hall A is leaking, and the main chiller that cools the building is slowly overheating.

Cost Responsibility: Lonestar Cloud pays for this repair under their lease (DC1-HALL-A-2024 §8.2), not the landlord.

"Tenant shall maintain, repair and replace the supplemental cooling units installed for Tenant's exclusive use in Data Hall A, at Tenant's sole cost."

ACTION PLAN

- Lone Star Mechanical comes Sunday 12:54 PM to fix it ($1,010).
- Pre-cool Data hall A to 68F supply tonight and shift batch load to hall B until the repair is verified (for 24 hours).
- Lonestar Cloud gets a heads-up email.
- MedRecords Health gets a heads-up email.

REASONING

- Lonestar Cloud and MedRecords Health would lose service under their contracts.
- 3 recent complaints all point to the same equipment.
- Building history: Oct 2026: compressor bearing replaced after vibration alarm. Vendor said refrigerant was 15% low at the time.

6. Tonight's Plan

Tonight's Plan

Several buildings need repairs at once, but there are only so many technicians and so much budget. The AI decides what to fix tonight and explains why.

Start Storm Night

Problems Waiting for a Decision 3

Building	What's wrong	Could cost if we wait	Repair	Who pays	Time left
Avon DC1	a cooling unit in Data hall A is leaking, and the main chiller that cools the building is slowly overheating	$113,525	$1,010	Lonestar Cloud	18 hours
Northstar Tower	an electrical panel on Floor 12 is overheating and could cut power to the whole floor	$11,113	$750	Parkway Capital	no deadline
Avon DC1	a weak power line during storms could push the site onto a backup generator and an aging battery	$150,113	$750	Landlord	no deadline
